SIKINDRA KUMAR

Full Stack Developer (MERN) | B.Tech IT '27 | Open to SDE Internships & Full-Time

+91-9135570749 | sikindrak884@gmail.com | LinkedIn | GitHub | LeetCode | Portfolio

Professional Summary

Full Stack Developer (MERN) and pre-final-year IT student who builds production-style web applications, from a multi-tenant platform with RBAC and tenant-level data isolation to a RAG-based AI code assistant using LangGraph and MongoDB Atlas Vector Search. Backed by strong problem-solving skills, with 1300+ DSA problems solved across LeetCode and GeeksforGeeks and a 1st place finish in the Eminance 2026 Coding Competition at CGC Landran.

Technical Skills

Languages: C++, Java, JavaScript (ES6+), SQL
Frontend: React.js, Redux, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, RBAC, OAuth (GitHub), Joi, Nodemailer
Databases: MongoDB, MySQL, Redis, IndexedDB
AI LLM: RAG, LangChain, LangGraph, Voyage AI Embeddings, Groq
Tools DevOps: Git/GitHub, GitHub Actions (CI/CD), Render, Netlify, Postman
Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Education

Chandigarh Engineering College, CGC Landran **2023 – Expected 2027**
B.Tech in Information Technology *CGPA: 8.79/10*
Class XII: 74.8% | **Class X:** 79.4%

Projects

Multi-Tenant School Management System | *Node.js, Express.js, MongoDB, React.js, JWT, Joi* **GitHub | Live Demo**

- Built a full-stack multi-tenant school management platform using React.js, Node.js, Express.js, and MongoDB for managing students, teachers, classes, attendance, and fees.
- Implemented JWT authentication, role-based access control (RBAC), tenant-level data isolation, and protected RESTful APIs for secure multi-role access.
- Designed a modular Node.js/Express backend with controllers, services, models, routes, and middleware, implementing Joi validation, rate limiting, and MongoDB indexing.
- Implemented tenant-scoped CRUD operations, OTP verification, password reset, duplicate prevention, and automated email notifications using Nodemailer.

AI Developer Productivity Platform | *React.js, Node.js, Express.js, MongoDB, LangChain, LangGraph* **GitHub | Live Demo**

- Built a full-stack developer productivity platform integrating GitHub OAuth and REST APIs to analyze repositories, commits, pull requests, issues, and code quality.
- Implemented a RAG-based AI code assistant using LangChain, LangGraph, Voyage AI embeddings, and MongoDB Atlas Vector Search to retrieve relevant repository code and generate contextual explanations.
- Developed repository analytics and code-quality insights for bug detection, optimization recommendations, productivity metrics, and repository health analysis.
- Deployed the application using Netlify, Render, and GitHub Actions CI/CD, implementing automated build and deployment workflows.

AI Resume Analyzer Web Application | *React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS* **GitHub | Live Demo**

- Built a full-stack AI-powered resume analyzer using the MERN stack to evaluate resumes against job requirements and provide actionable insights.
- Developed RESTful APIs using Node.js and Express.js for authentication, resume processing, analysis, and user management.
- Implemented JWT authentication, role-based access control, protected routes, and secure resume file uploads.
- Integrated AI-based text processing to extract resume content and evaluate skills and experience against job requirements.

Achievements

- Solved 1300+ Data Structures and Algorithms (DSA) problems across LeetCode and GeeksforGeeks.
- Secured 1st Position in the Eminance 2026 Coding Competition at CGC Landran.
- Participated in the Smart India Hackathon (SIH) 2025 Internal Round as a team leader.

Certifications

- **NPTEL – Database Management Systems** | IIT Kharagpur
- **HackerRank – Problem Solving (Intermediate), JavaScript, Frontend Developer (React)**
